

LUNA Administrator

Distribute LUNA web-based tools more widely than ever before possible. The simple UI makes managing users and granting access to collections simple. Easily grant different levels of permission to the LUNA Viewer, the LUNA Library, and the Collection Manager using different roles and credentials.

In addition to regular users, there are "admins" and "super admins". A super admin is the only one who can access the "Application Configuration" tab, "Soft Reset" tab, make other super admins, and edit passwords.

LUNA Administrator

Welcome admin | [Tools](#) | [Settings](#) | [Help](#) | [Log Out](#)

The screenshot shows the LUNA Administrator interface with the 'Users' tab selected. The interface includes a navigation bar with tabs: Users, Access Permissions, Credentials, Collections, Application Configuration, Media Groups, and more. Below the navigation bar, there are action buttons: Select all, Deselect all, Edit Selected, and Create New User. A search bar is also present. The main content is a table with the following columns: User ID, Username, Credential, Email, First Name, Last Name, Authenticator Type, and Super Admin. The table contains five entries. At the bottom, it says 'Showing 1 to 5 of 5 entries'.

User ID	Username	Credential	Email	First Name	Last Name	Authenticator Type	Super Admin
1	admin	Administrator		LUNA	Administrator		Yes
2	michelle	M Test Cred		M	d F		
3	nancy	Department A					Yes
4	george	Department A					
5	anna	Administrator
