

Collections

The Collection tab in the **LUNA Administrator** allows you to manually set the order for the list of collections in the **LUNA Library** and **LUNA Viewer**.

Select the collection (click to highlight) and click "Edit Selected" to change the Sort Order number for a collection. The lowest number collection will appear first in the list in the **LUNA Viewer**. When you have all your collections in the proper order you will need to restart Luna 7 (tomcat) to have the changes take affect.
