

# Accessibility Information

## Accessibility Statement

Luna Imaging is committed to making our public facing tools accessible to as broad an audience of users as possible.

We work with our community of clients and value their feedback and accessibility reporting which we use to enhance and improve the user experience. We strive to improve accessibility without losing or suppressing functionality.

LUNA is continually designed and developed to approach Level AA of the W3C Web Content Accessibility Guidelines (WCAG 2.1) and Section 508 of the US Rehabilitation Act for features and functions. Since LUNA is a visually focused toolset we know we can not meet all of the specifications.

We are the creator of the software that hosts a wide range of material. We will always strive to make these tools accessible to as many people as possible. We support Images, videos, audio, text documents, as well as embedded html based content. However, we do not create the content that is used within the LUNA toolset. Our clients are responsible for the content they place into the LUNA software.

We always welcome feedback from our clients and users. Since most of our clients are organizations, we ask that you contact them first about accessibility concerns.

- E-mail: [Email us your questions to accessibility@lunaimaging.com](mailto:accessibility@lunaimaging.com)

We will try to respond to you within a week.
