

# LUNA 7.1.5.6, 7.1.5.7 & 7.1.5.8 Patch Release Notes

**Posted: June 30, 2015**

**LUNA 7.1.5.8** is a patch to fix a bug whereby the contents of the LL\_MEDIABATCHELEMENTS were lost during the migration process or did not exist, causing the Export of media in the LUNA Library to fail. **Note:** If you see this problem, please contact Luna Support.

**LUNA 7.1.5.7** is a patch to fix a bug that was displaying an error page for some images brought into the Detail View. The bug was introduced in v7.1.5.6 to correct the field display in the Viewer so it would match the data schema.

**Posted: May 15, 2015**

**LUNA 7.1.5.6** is a minor release that includes bug fixes.

- Fixed a bug in the LUNA Uploader that caused tab delimited linking files to fail when the media item filename contained a space.
- Fixed a bug in the LUNA Library that caused a failure when exporting data to a .csv file if one or more records contained a multi-value field within a nested field group.
- Fixed a bug whereby the field display order in the LUNA Viewer did not always match the data schema for the collection.
- Fixed a bug in the LUNA Viewer causing facet searches to fail when forward slash exists in the data value.
- Fixed wild card searches in the LUNA Viewer so they are not case sensitive.
