LUNA 7.4.1 is a release that introduces a new feature and includes several bug fixes:

Feature:

- Ability to limit export size in LUNA.

Bug Fixes:

- Fixed a bug in the LUNAversal Viewer whereby initial access to the Detail View on mobile devices resulted in an error.
- Fixed a bug in the LUNA Viewer that caused the drop down menu not to work on Android/iOS and touch-enabled devices.
- Fixed a bug in the LUNA Viewer on Chrome whereby the export file returns an error when commas are included in the data for the title field.
- Fixed a bug in the LUNA Viewer making it unable to reorder images in a Media Group with My Uploads content.
- Fixed a bug in the LUNA Viewer causing the Refine panel to remain hidden after closing it.
- Fixed a bug to remove XMP metadata from displaying in the LUNA Viewer's thumbnail labels and media summary field panel.
- Fixed a bug in the LUNA Viewer whereby no flashing confirmation signal was given after adding a Flickr image to a media group.
- Fixed a bug in the LUNA Viewer causing exports to fail for My Uploads items.
