

LUNA v7.2.0.1 Patch Release Notes

Posted June 6, 2016

LUNA 7.2.0.1 is a minor release that includes the following bug fixes:

- Fixed a bug in the Uploader whereby a custom thumbnail was not getting created for a PDF if the extension was upper case.
- Fixed a bug causing the thumbnail image for a PDF to appear as a separate image when uploading the file using the "+" icon in the Uploader.
- Fixed a bug in the Uploader causing data uploads to fail when field names contained diacritics.
- Fixed an issue whereby PDF/ misc content that was migrated from LUNA 6 would not show the move and copy options under the More menu.
- Fixed a bug in the Viewer where PDFs with upper case extensions were not opening in the Detail View.
- Fixed a bug whereby the Detail View was not loading images until the window was resized in IE.
- IIIF - Removed a invalid local manifest url
- IIIF - Fixed the jp2k url for scaling ratio higher than 8
- IIIF - Fixed the jp2k url for remote media servers and the scaling issue
