

# Find and Replace

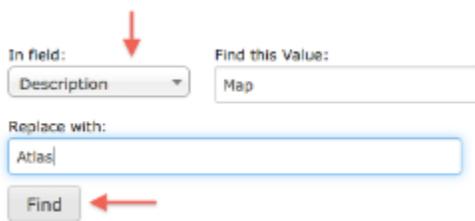

LUNA v7.1.6+

You will need to navigate to the **Library** from the **Tools** menu. You must also select a collection to work with (upper left side, small blue triangle). Find and Replace is located under the **More** menu. When selected it will open a dialog window to ask you what you want to find and replace.

By default record **Data** will be selected but you can click to select **Custom Data for media items**. You will have the option of performing a find and replace on all the items on the page or the current search result. If you selected several items by clicking on them (red highlight box appears around thumbnail) you will also have an option to perform a find and replace on the selection you have made.

Next, select a field and begin typing the value(s) you are searching for in the box to the right. Then in the box below, type the value(s) you want to replace with and click the **Find** button.

 Find and Replace is case sensitive, so make sure you are using the correct case when typing in a search value.

In field:  Find this Value:

Replace with:

Found Value Record 1 of 4

**Map**

The found values will display in the box at the bottom of the window, highlighted in yellow. For each value found, you will have the option to **Find Next** (skip to the next value), **Replace/Find** (replace the current value and continue to the next) or **Replace All** (replace all values found).

In field:  Find this Value:

Replace with:

Found Value Record 8 of 8

Engraved by J.H. Young & F. Dankworth. See Africa **Map**. Quite different from Tanner's early map of South America in the American Atlas. Probably a Finley production from the 1830's. Inset maps include: Harbour Of Rio Janeiro; Comparative Heights Of The Principal Mountain Towns & Of South America; **Map** of the Country in the Vicinity Of The City Of Buenos Ayres; **Map** of the Lengths Of The Principal Rivers Of South America. Full color by country. Folds into marbled end sheets and into a new tan cloth folding case 30x22 with "South America H.S. Tanner 1845" stamped in gilt on the spine.

When there are multiple found values in a field, the active value will be highlighted yellow and the additional values will be highlighted in blue. Use your cursor to click the value you want to replace.

#	Collection	Info
26	Map and atlas	Info Search Value : Map Replace Value : Atlas
25	Waltie	Info Query
22		Info

**Additional Tips:**

- Click on the info icon above the "Found Value" box to view the full data record you're currently on.
- At the top right of the "Found Value" box you will see the total number of records found.
- The **Find Replace Status** button in the lower right corner of the dialog box will take you the status page to view all of your "Replace All" queries. Click **Info** to see the "Find" and "Replace with" value(s) for a query. Within the Info box, click "Query" to return to the thumbnail view belonging to a "Find and Replace" query.
