

LUNA 7.1.6.7, 7.1.6.9 & 7.1.6.11 Patch Release Notes

Posted Mar. 23, 2016

LUNA 7.1.6.11 is a minor release that includes the following bug fix:

- Fixed a bug where the collections selected were being set when logging in to the Viewer based on the collections available when not logged in.
- Fixed a bug in the Viewer where the slideshow stops at slide 21 for large media groups.

LUNA 7.1.6.7 is a minor release that includes the following bug fixes:

- Fixed a bug in the linking file that was causing items to link to all records when some items in the linking file had file name only, without an associated field value.
- Fixed a problem that stems from how we use an internal service called ehcache to propagate sessions between the various LUNA tools. See [LUNA 7 performance slowing](#) for more information.
- Fixed a bug whereby under certain circumstances, users can't login directly through the Uploader and they may not have been able to migrate collections in previous versions of LUNA 7.1.6.
