

Application Configuration

Settings used in the Application Configuration are used to control how the LUNA server is configured.

You can: Create, Edit and Delete attributes.

If you want to change one of the Attributes you need to highlight that line and then click "Edit Selected" at the top. You can then change the value and save.

Attribute	Attribute Value
adsEnabled	false
alternateSearchEnabled	false
analyticsEnabled	false
dcid0	
dcpw0	JNNLx77d
fetchExternalPublicContentGuid	
linkSearchEnabled	true
linkSearchExcludedFields	Collection, Image ID, Resolution Size, Format, Media Type, File Name, Width, Height, Originating Url
linkSearchHideDelayMilliSec	1000
linkSearchShowDelayMilliSec	50
lunaServerAddress	localhost
lunaServerPort	8181
maintenanceGuid	
oaiRepositoryAdminEmail	
oaiRepositoryName	

These changes will affect the operation of the LUNA server. Only Super Admins can see and edit these. Do not make any changes without proper knowledge of what you are changing.

Most changes here require restarting Luna 7.

If you have a question regarding any attribute, contact Luna Support. lunasupport@lunaimaging.com
