

LUNA 7.4.2.1 Release Notes

Posted January 25, 2019

LUNA 7.4.2.1 is a patch release that includes:

- Fixed a record to media linking issue brought on by enhancements to the Library's value lists in 7.4.2, whereby linking was no longer case insensitive. If there were any caps in the field, linking would fail. When upgrading to v7.4.2.1, you will need to [Rebuild the Library Index](#) for all collections that use value lists. Note: This will not affect the LUNA Viewer.
- Fixed a bug in the LUNA Viewer causing an unexpected error when a Media Group is empty.
